## FAQs

## **What is a safety sign?**

A safety sign is a sign used to indicate an area such as a road or any other environment is safe to be in.

## **Why do businesses use the signs?**

Businesses such as a pub or a store make use of signs so that customers can be aware of something right away just by looking at the sign.

## **What are hazard warning signs?**

Hazard warning signs are signs used to warn people of danger such as a slippery road during the wintery season or construction work outdoors.

## **What makes a good sign?**

A good sign is informative, attention-grabbing, and present in a place where everyone can see it.

## **What is the difference between a warning sign and a caution?**

A warning sign is placed in an area that one must avoid at all costs while a caution sign is placed in the area where one can still be in but have to be careful.

## **Why are signs so effective?**

Signs are a great way to spread information to people with just a few words (or none at all) and without needing to repeat it.

## **What is the standard size for warning signs?**

The standard size for warning signs is 16" x 20" inches.

## **Why do we need signs on the road?**

Signs on the road can effectively communicate with drivers who rely more on visual forms of communication than verbal ones.

## **What do diamond-shaped signs indicate?**

Diamond-shaped signs are used to indicate a warning.

## **What are speed limit signs?**

Speed limit signs are signs that instruct drivers to drive at a specific speed while on the road to avoid accidents.
