

How to Change Font in Adobe Illustrator for EPS file

One can never go wrong by expanding their font choices and selecting the font style they prefer. Thus, if you're thinking of broadening your horizons by changing fonts in Adobe Illustrator, this is your safe haven.

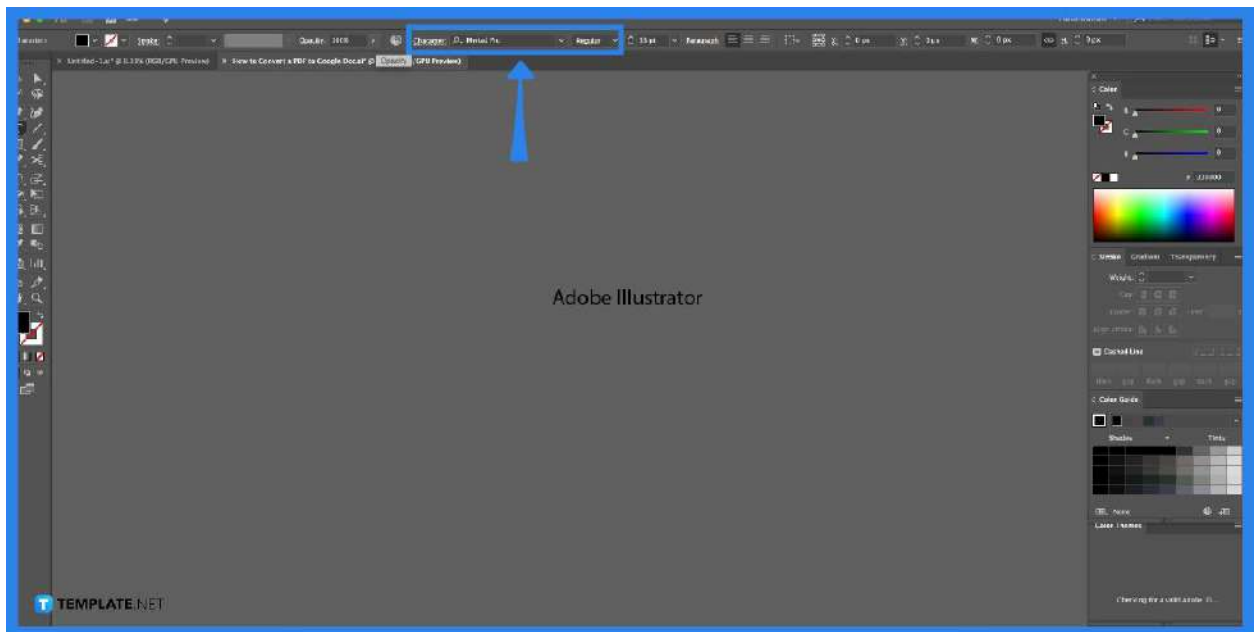

How to Change Font in Adobe Illustrator for EPS file

In the context of EPS files, embedding implies including font data in a file so its type will appear and print appropriately if the file is opened in another program. To begin with, font embedding, right-click on the active document and choose Document Properties from the context menu; a box with several tabs appears, allowing you to evaluate the export settings.

- **Step 1: Find and use the Adobe ToolKit**

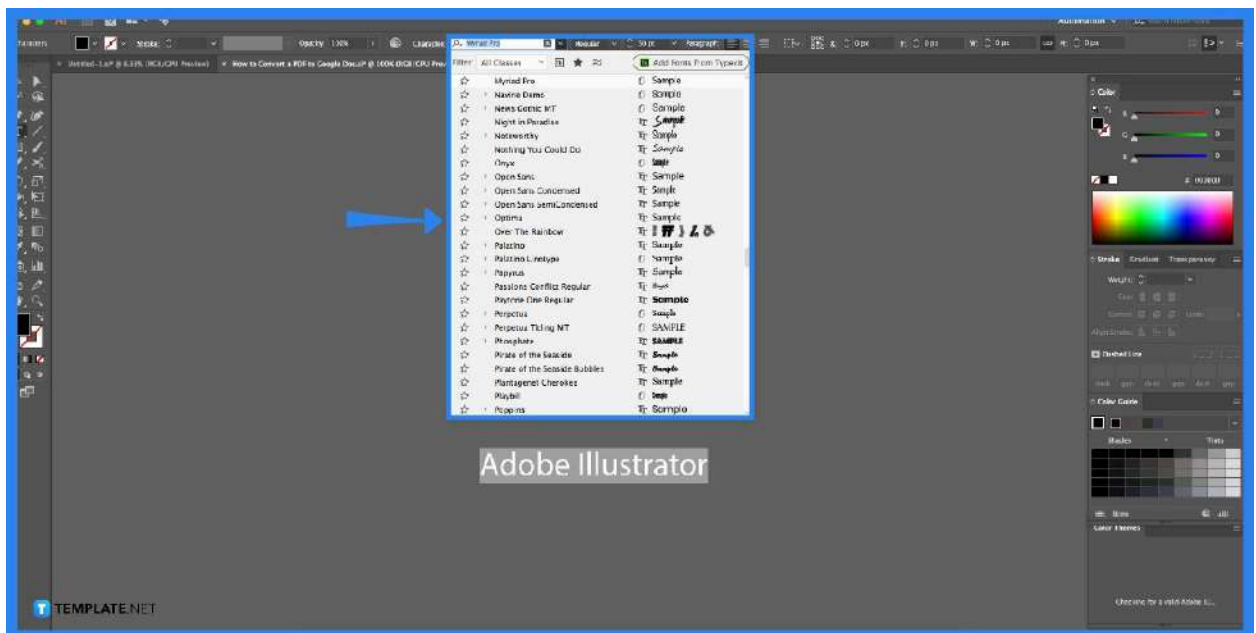

Proceed to add a new font from the large Adobe Typekit collection, which is available with your Adobe Creative Cloud subscription. With your text chosen, under the Properties tab, under Character, click the Font Family drop-down option and choose

Add Fonts from Typekit.

- **Step 2: Select the font of your choice**

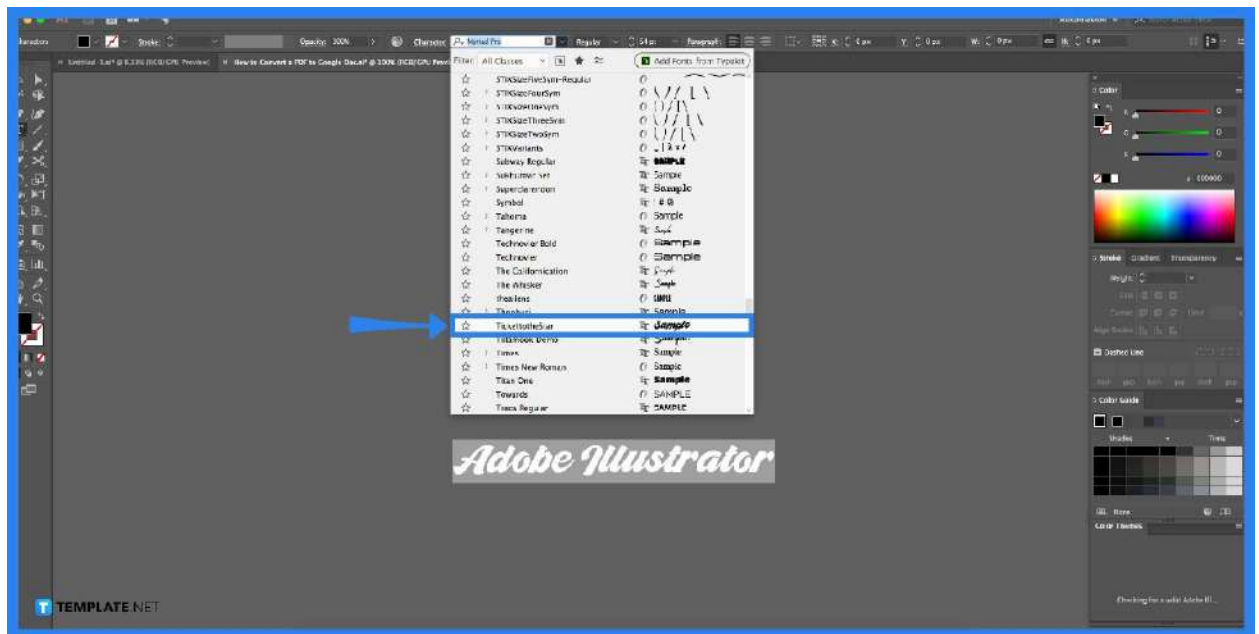

Browse through the large selection of typefaces or narrow your search. Select a Classification type, such as Serif or Sans Serif. Alternatively, use the top search bar to find a font.

- **Step 3: Click your preferred font style and size**

When you find a font style you like, choose it and click Sync to save it to your computer. Drag and drop the text to select the section, or place your cursor in the text and hit Control+A. (Windows). Using the Properties panel on the right, you can

change the font, style, and size.

- **Step 4: Go to Font Menu**

In Illustrator, go to the Font menu and choose your new Typekit font. If you have many fonts on your computer, use the Typekit Font Filter button to discover your new font quickly. You may choose any font from Adobe Kit and change the font of the text you desire to alter (or you may refer to step 3).
