

# How to Curve Text in Adobe Illustrator

Many logo designs, flyers, leaflets, and posters have curved text. Businesses and organizations use this design element to make eye-catching and sophisticated text that will surely entice the people. It is easy to make a curve text with Adobe Illustrator, so read this article to know more in making a fancy text for your design project.

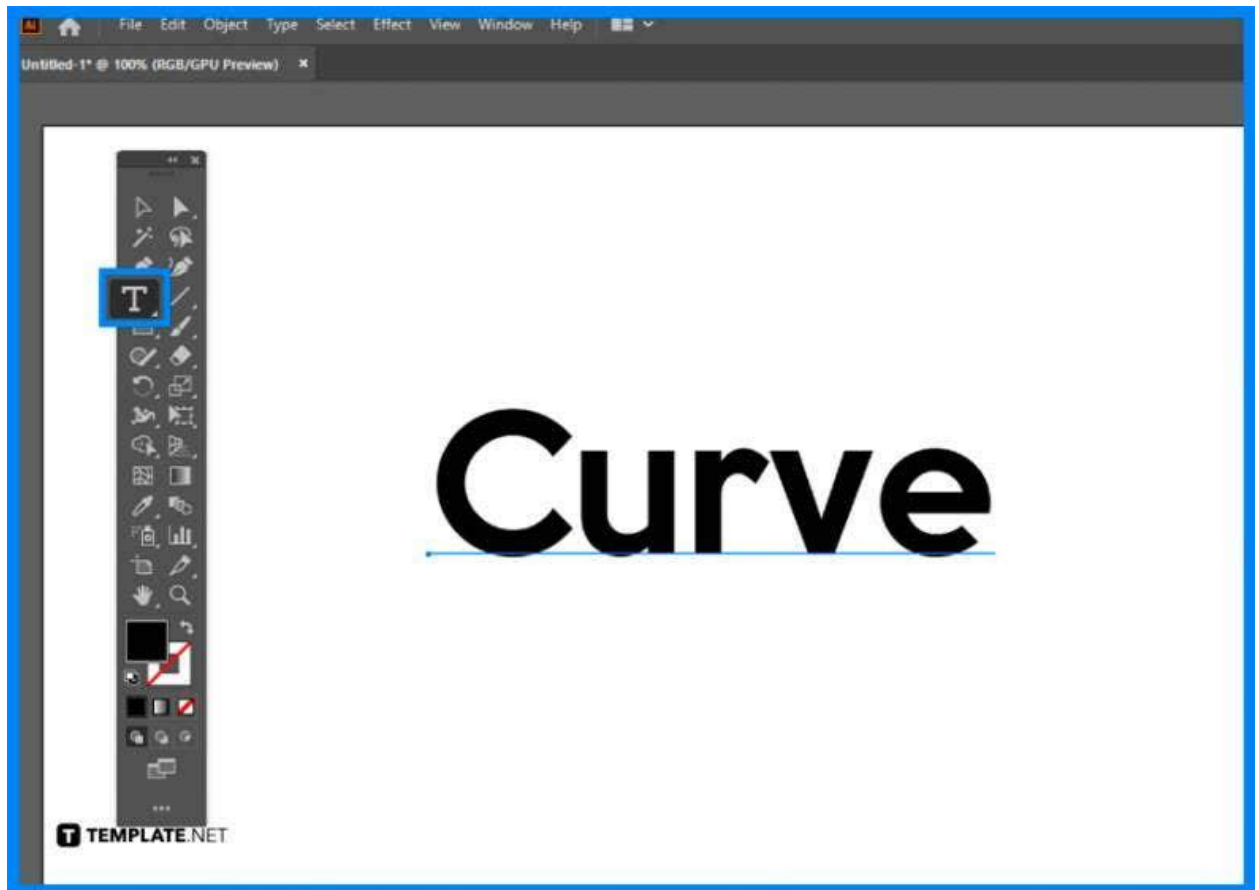

## How to Curve Text in Adobe Illustrator

Every graphic designer and visual artist should be knowledgeable about making curved text. If you are learning as a beginner or you just want to have a refresher, here is a simple tutorial to guide you in adding a curve to text in Adobe Illustrator.

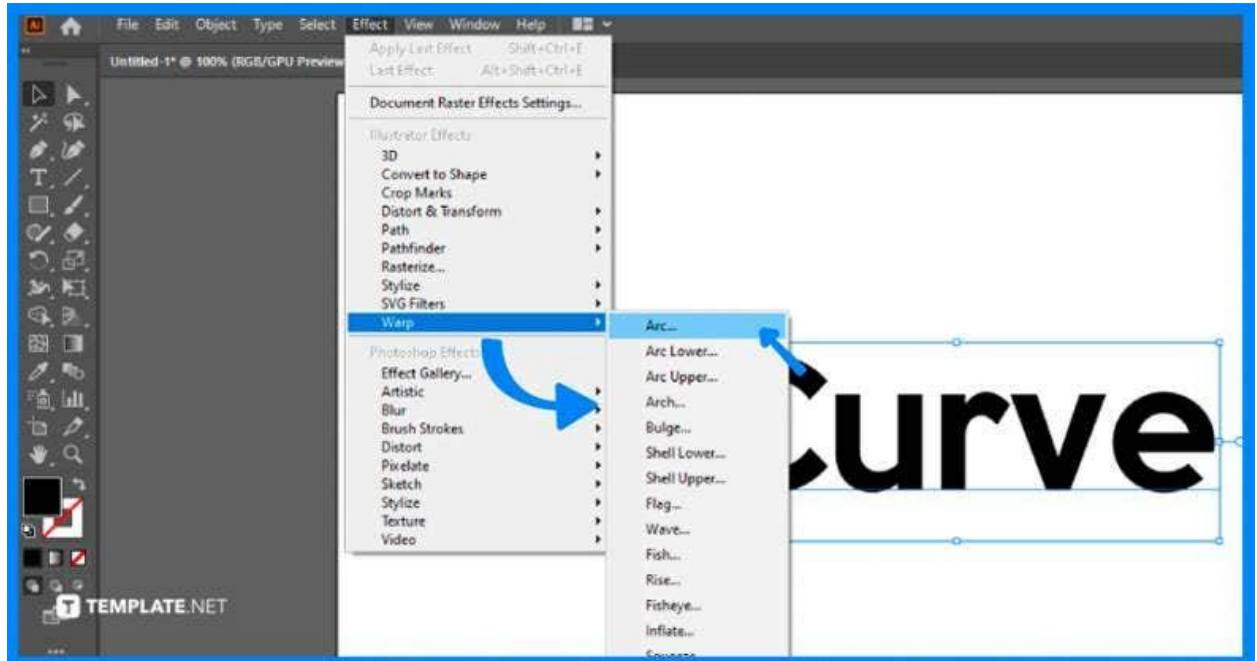

- **Step 1: Type the Text**

Using the Type tool, add the text in your document. Then, select the text you want to curve.

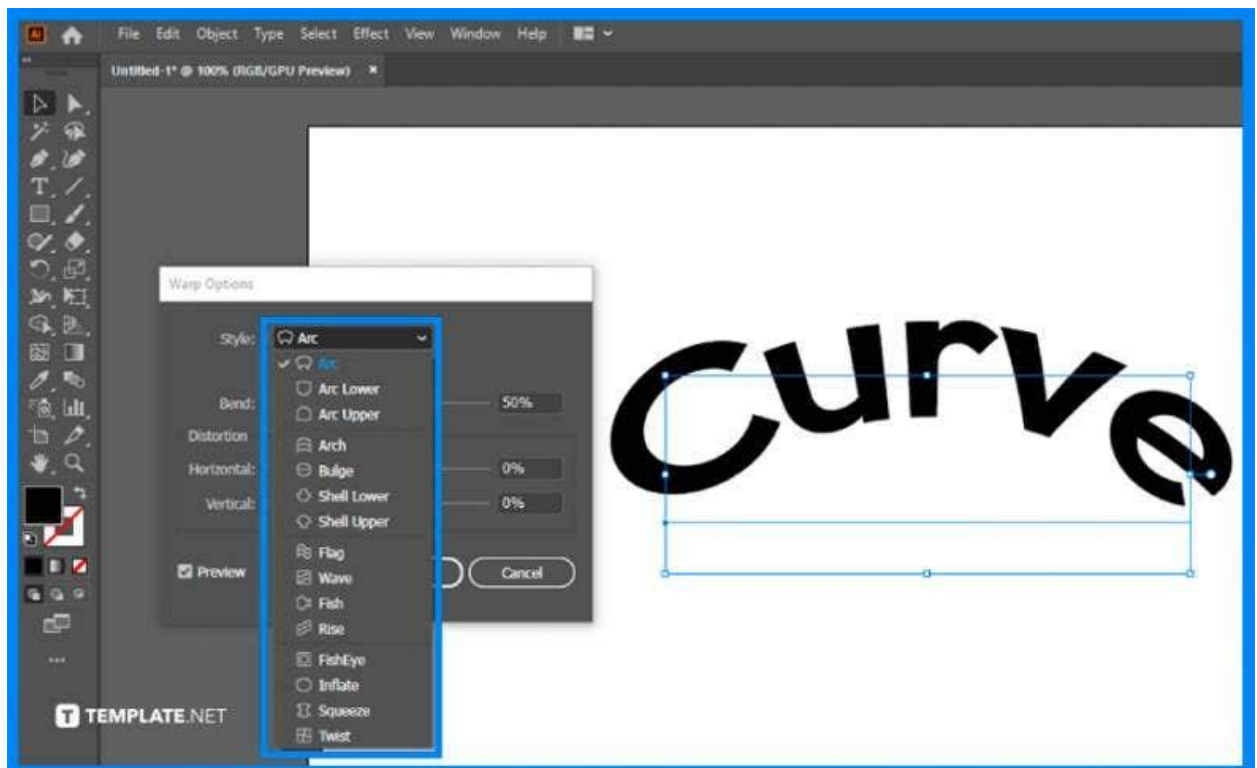

- **Step 2: Warp the Text**

Go to the Effect option, and look for Warp. Choose from the options listed there on what kind of curve you want for your text such as arc, arc lower, arch, bulge, flag, wave, and many others.

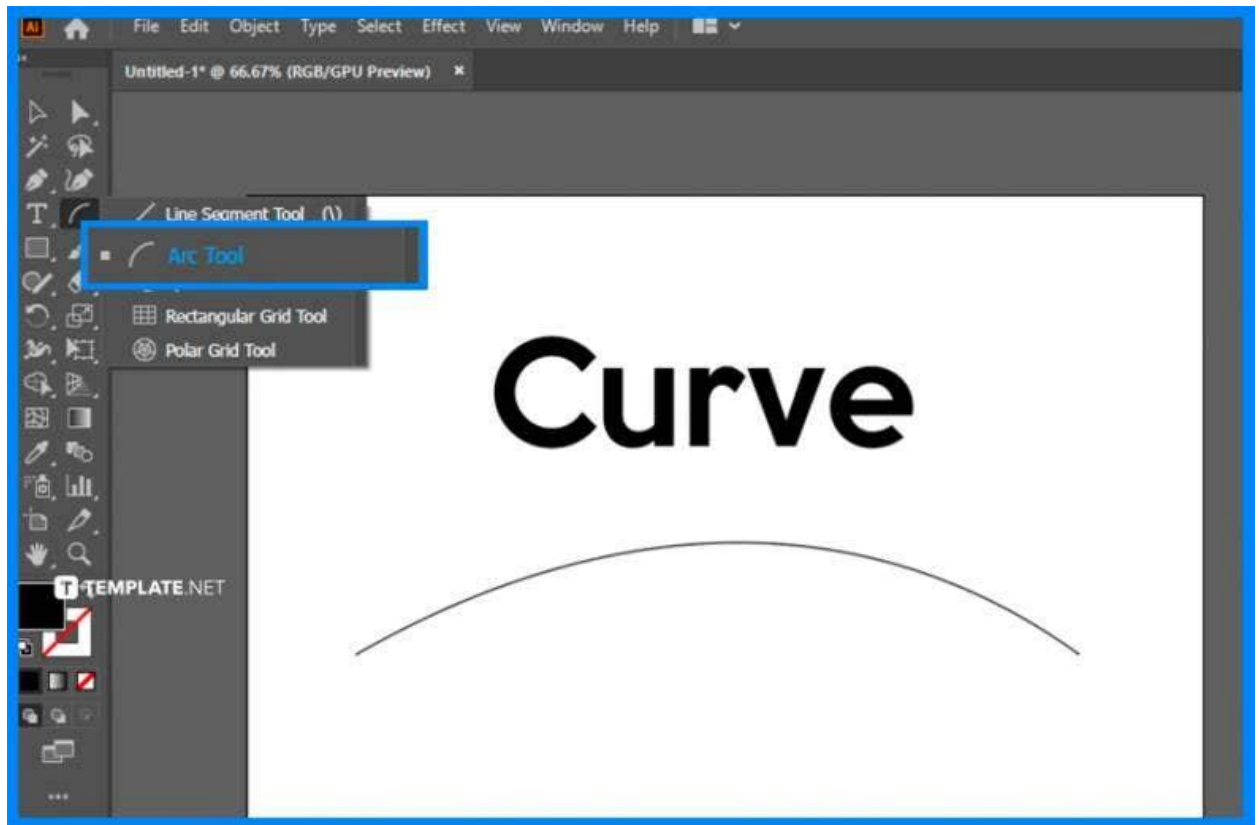

- **Step 3: Distort or Bend the Text**

Open the Warp options panel. Explore other options such as bend, and distortion.

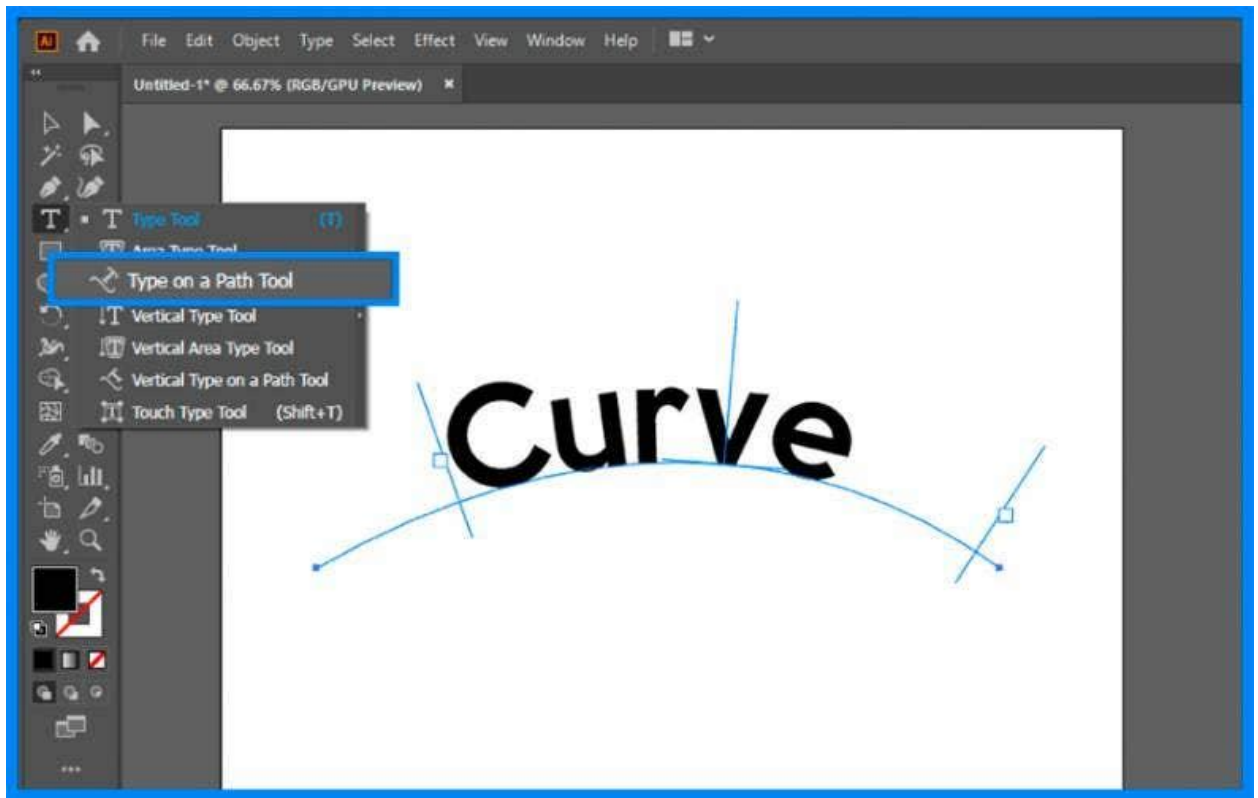

- **Step 4: Draw an Arc**

Another way to quickly edit curved text is by using the Arc tool to create curve line. Draw an arc by clicking and dragging your cursor anywhere on your artboard.

## Step 5: Use the Type on a Path Tool

Select the Type on a Path Tool and click on the arc. You will see a random text, delete it and type the text you want to.
