How to Export PNG in Adobe Media Encoder
Discover how to export PNG in Adobe Media Encoder. That way you can catch cool images in a cinematic style.

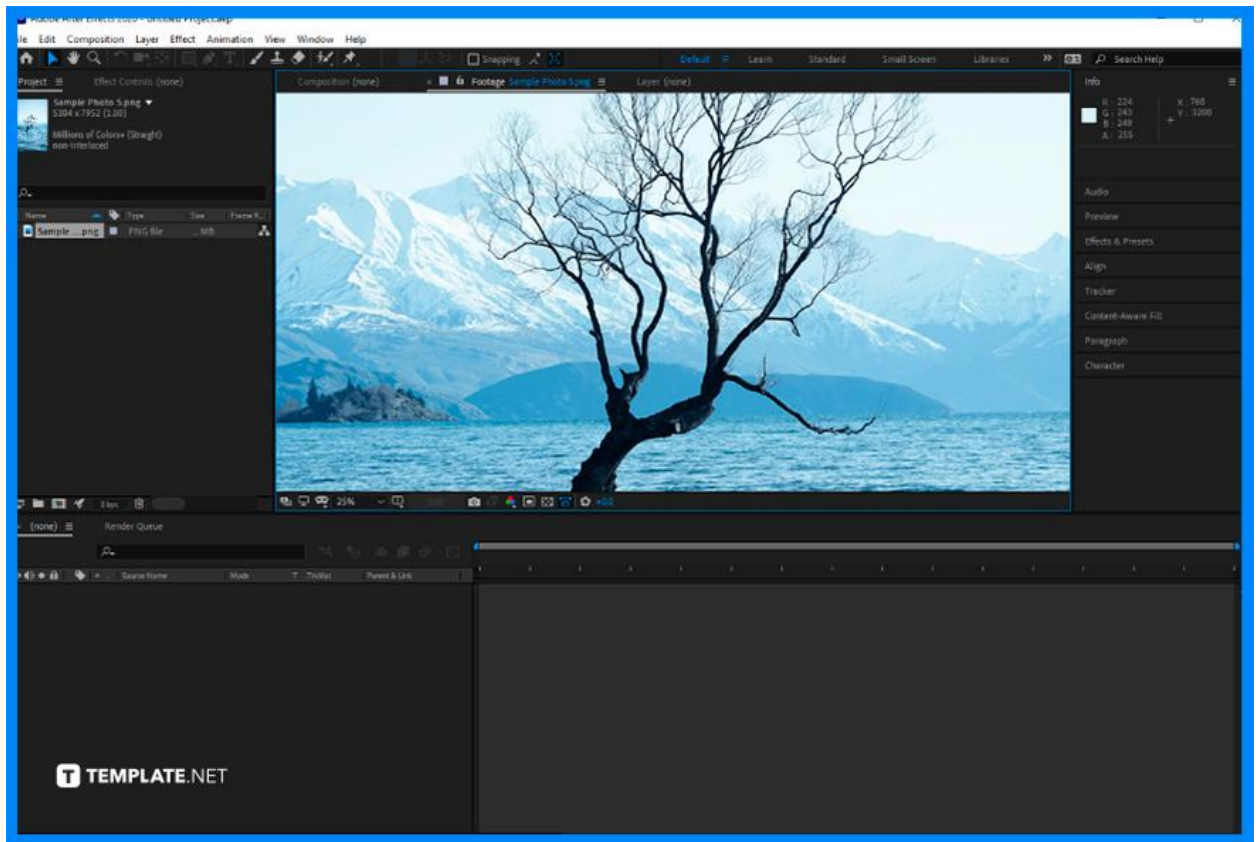

How to Export PNG in Adobe Media Encoder

Exporting PNG files take a few minutes. You can do so with these easy steps.

- **Step 1: Open Adobe After Effects and Insert Footage**
  To get started, open Adobe After Effects first and then add your footage to the program. You can do so by dragging the image onto the project.

You can either create your footage on media Encoder or use a preexisting one.
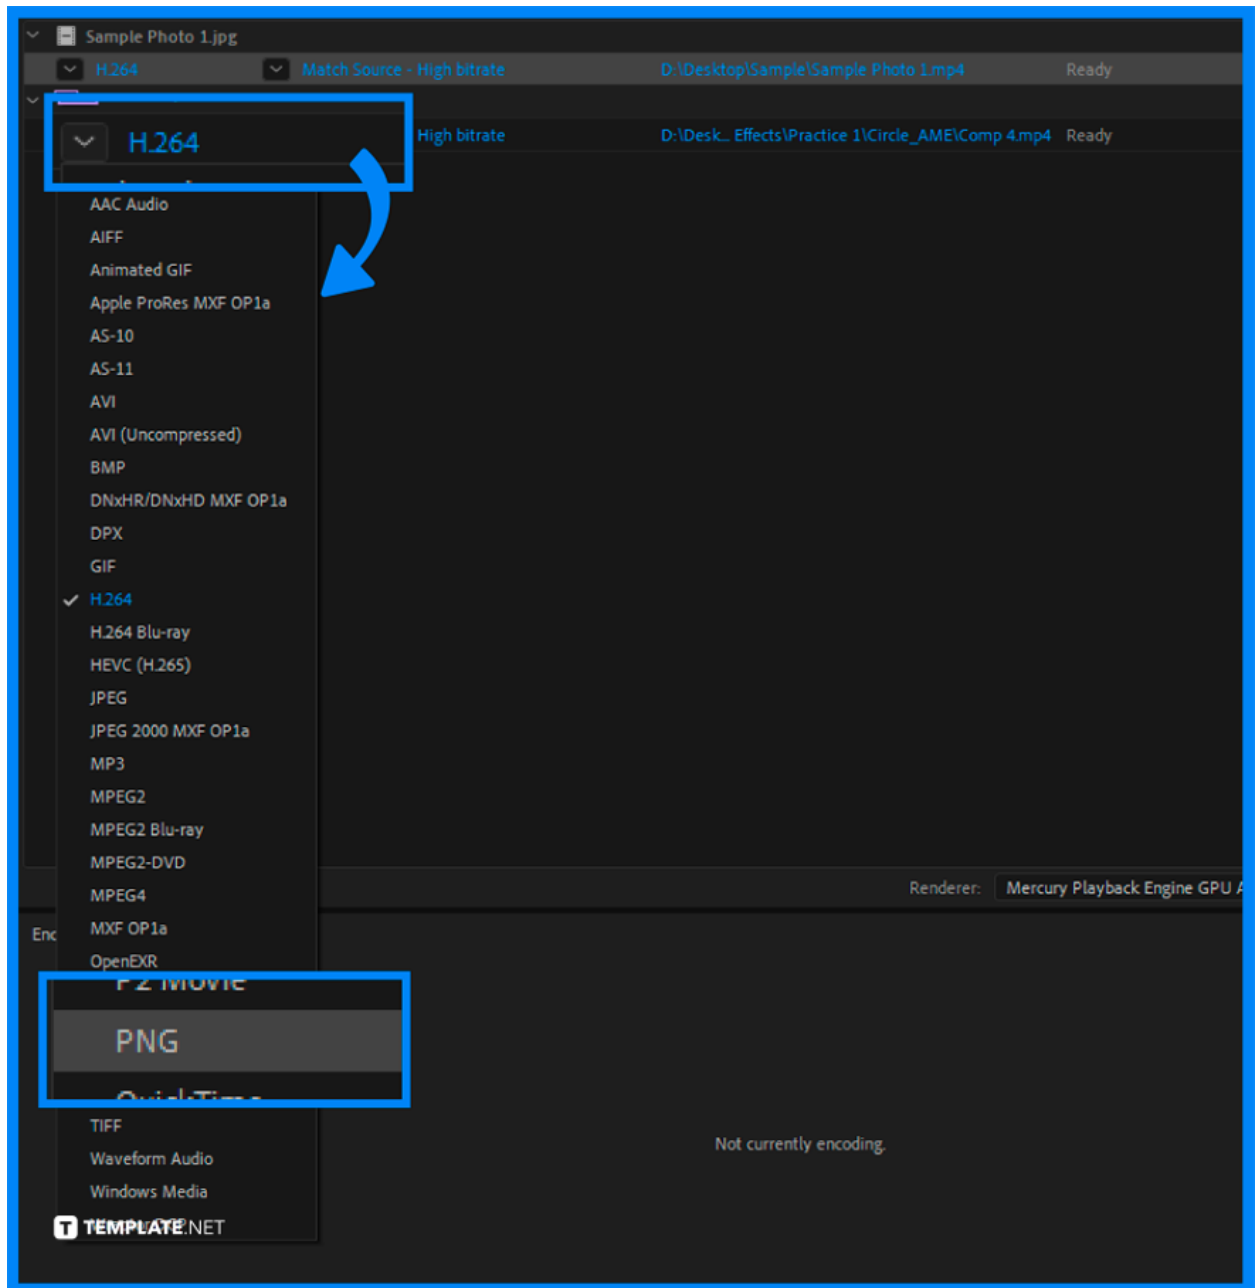

- **Step 2: Click File, Export, and Add Adobe Media to Encoder Queue**

  Up next, move your cursor to the top part of the screen and click on 'File'. A dropdown will appear and from there, click on 'Export' and 'Add Adobe Media to Encoder Queue...'. It will open a window that shows Adobe Media Encoder.
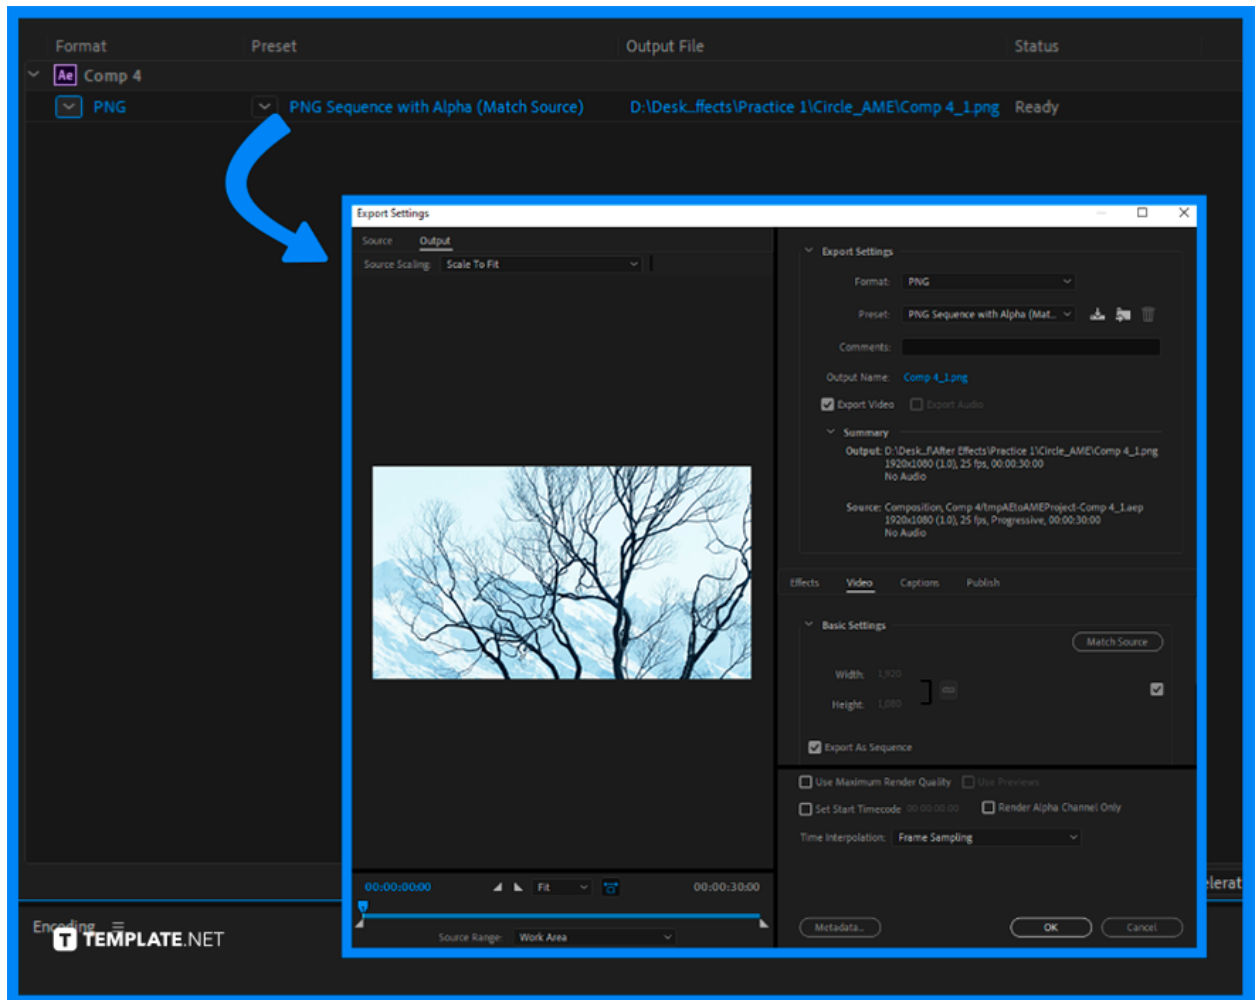

- **Step 3: Choose PNG format**
  Underneath the Format dropdown menu at the queue, you can see the options of how to export the footage. Click on PNG.
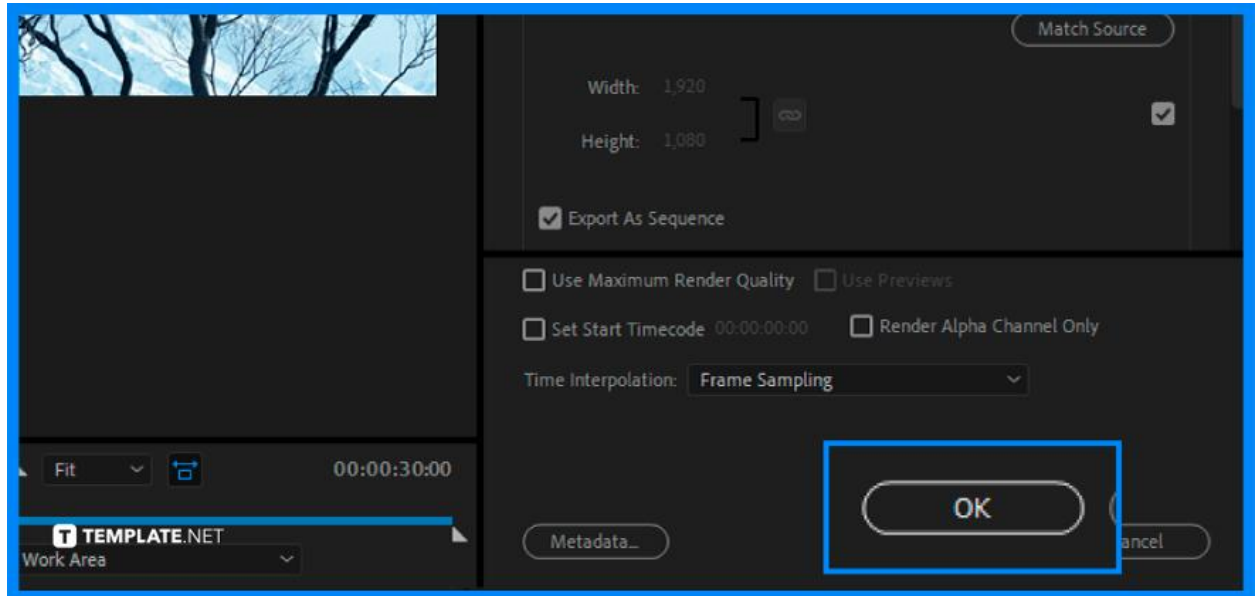

- **Step 4: Click PNG again**
  Click on PNG again the second time after choosing it, to open a dialog box that is the Export Settings.

- **Step 5: Finalize and Click OK**
  Finalize the options of how you want the PNG sequence to be like, once you are done, click OK on the dialog box. And that is how you export a PNG in Adobe Media Encoder.
