

Flipping a picture in Microsoft PowerPoint is certainly possible in just several steps. Besides the flip transition and the rotate slide presentation, the objects inside [Microsoft PowerPoint](#) slides such as shapes and images can also be flipped or rotated however you want.

How to Flip a Picture in Microsoft PowerPoint

There is no need to stick with the default position or arrangement of an image in [Microsoft Office](#) PowerPoint. Similar to how you can adjust the arrangement of a text box or shape, flipping a picture is made easy on PowerPoint for years.

- **Step 1: Open PowerPoint and Insert a Picture**

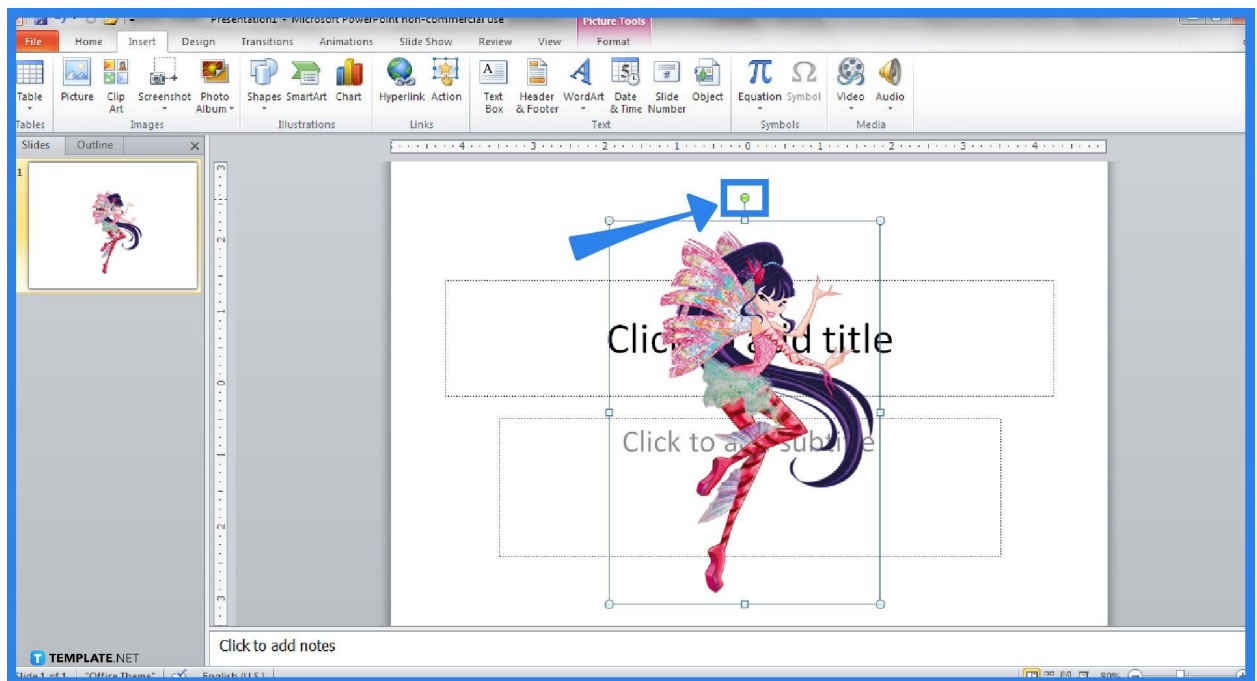

First things first, open Microsoft PowerPoint and create a new presentation. To practice flipping a picture, insert a picture in the slide first. Select "Insert" on the top menu followed by "Picture." Then, open the image you want to customize.

 **TEMPLATE.NET**

- **Step 2: Click on the Image to Access the Rotation Handle**

Click on an object or picture you want to flip. Then, a green dot appears on the top of that image and that serves as the rotation handle. Click and drag on it so you decide how much you want to flip or rotate your picture in a PPT slide.

- **Step 3: Flip with Perfect Dimensions through Formatting**

For those who [use Microsoft PowerPoint](#) 2010 or any older version of Microsoft PowerPoint, you may opt for perfect dimensions to flip or rotate by clicking the "Format" tab on the upper menu. Next, tap "Rotate" so you can choose whether to rotate right 90°, rotate left 90°, flip vertical, or flip horizontal. Or, click "More Rotation Options" for other customization features.

- **Step 4: Click Arrange for Newer PowerPoint Versions**

New Microsoft PowerPoint versions utilize the "Arrange" button. Next, select "Rotate" and either flip horizontal or flip vertical. Or, go to "Arrange," "Rotate," and "More Rotation Options" for other dimensions you want to try on.

FAQs

Can you mirror an image in Microsoft PowerPoint?

Yes, you can mirror a picture in PowerPoint by clicking the "Flip Horizontal" button in the "Arrange" tab or the "Rotate" option.

What does flip vertical mean?

Flip vertical means the object or image is presented in an upside-down position.
