

How to Save GIMP as PNG

GIMP is open-source software that anyone can use to make art and images. This will enhance your experience working on it when you find out how to save GIMP as PNG.

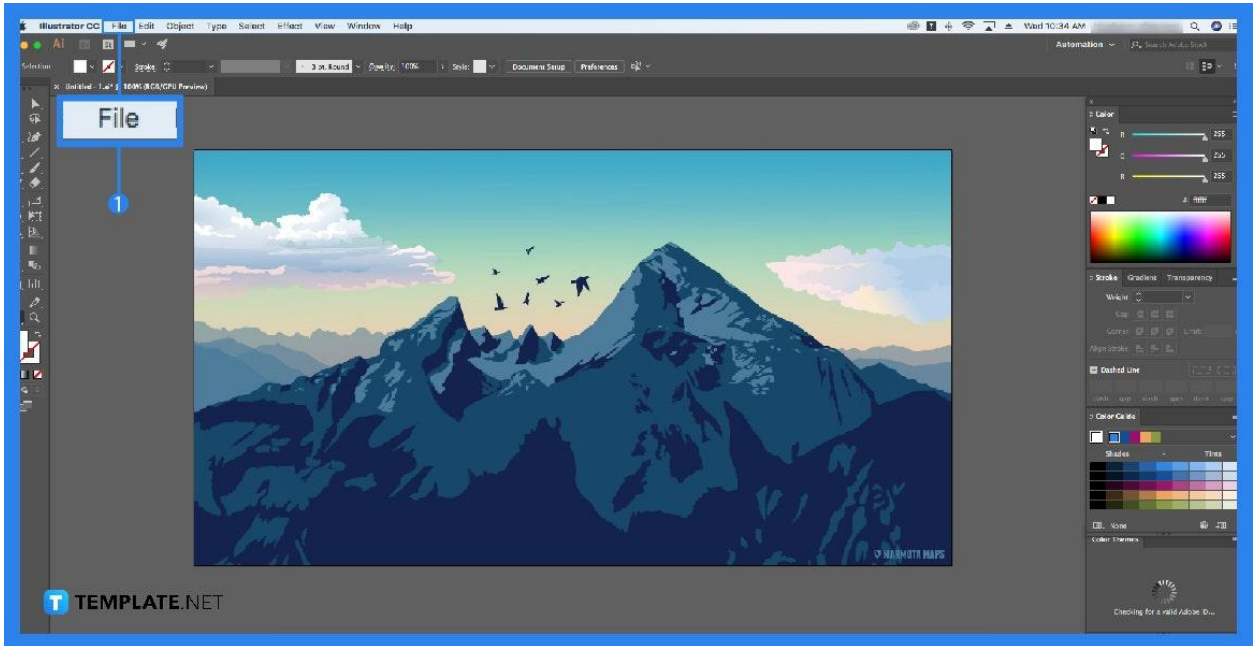

How to Save GIMP as PNG

Working on GIMP to make PNG files is pretty easy. Find out how with these easy steps.

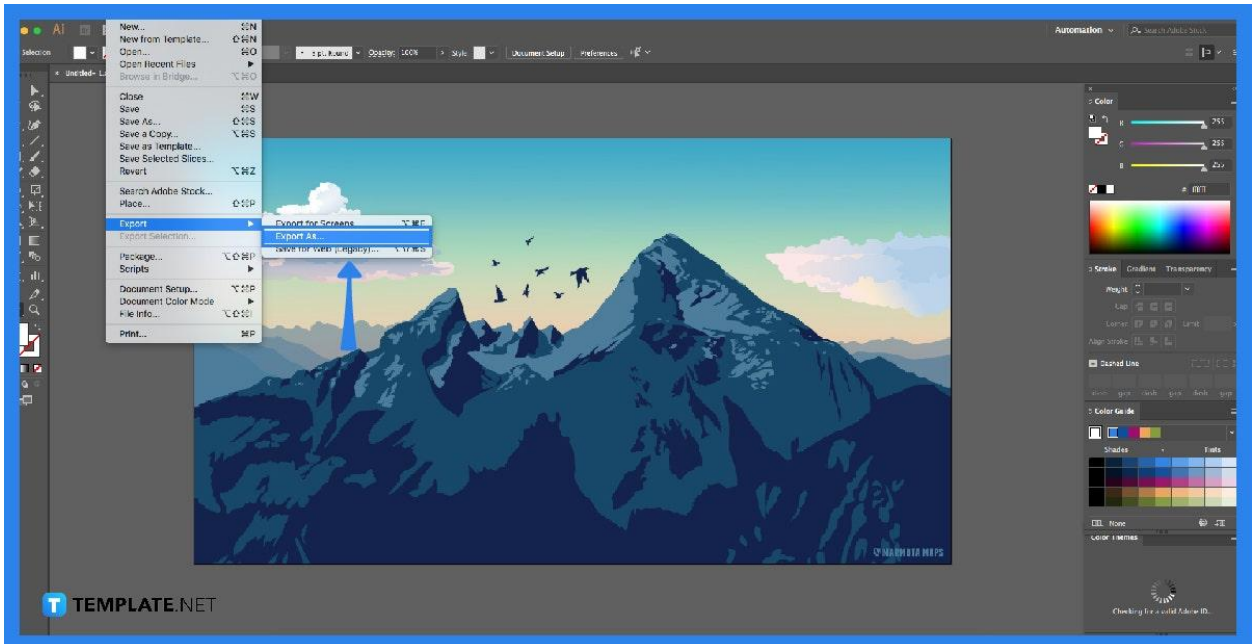

- **Step 1: Open GIMP**

To get started on saving an image as PNG, open your GIMP app.

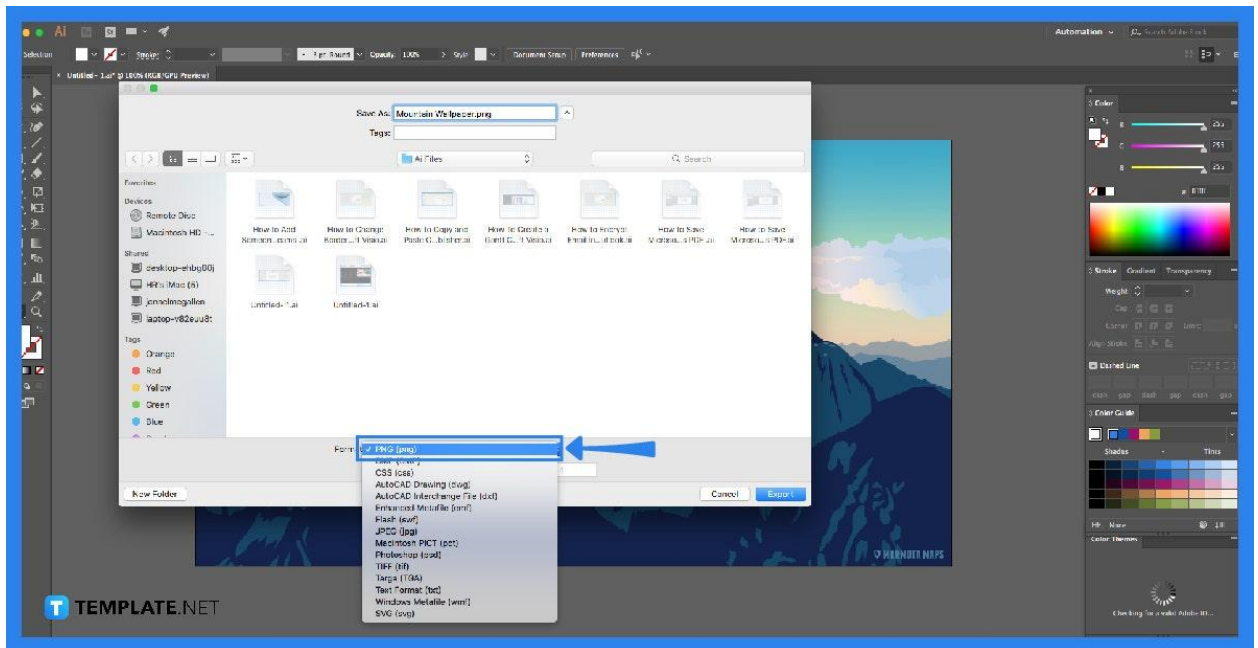

- **Step 2: Insert Image**

Next, you can insert the image you wish to save as PNG. You can do this by either clicking on insert or by creating an image with the tools.

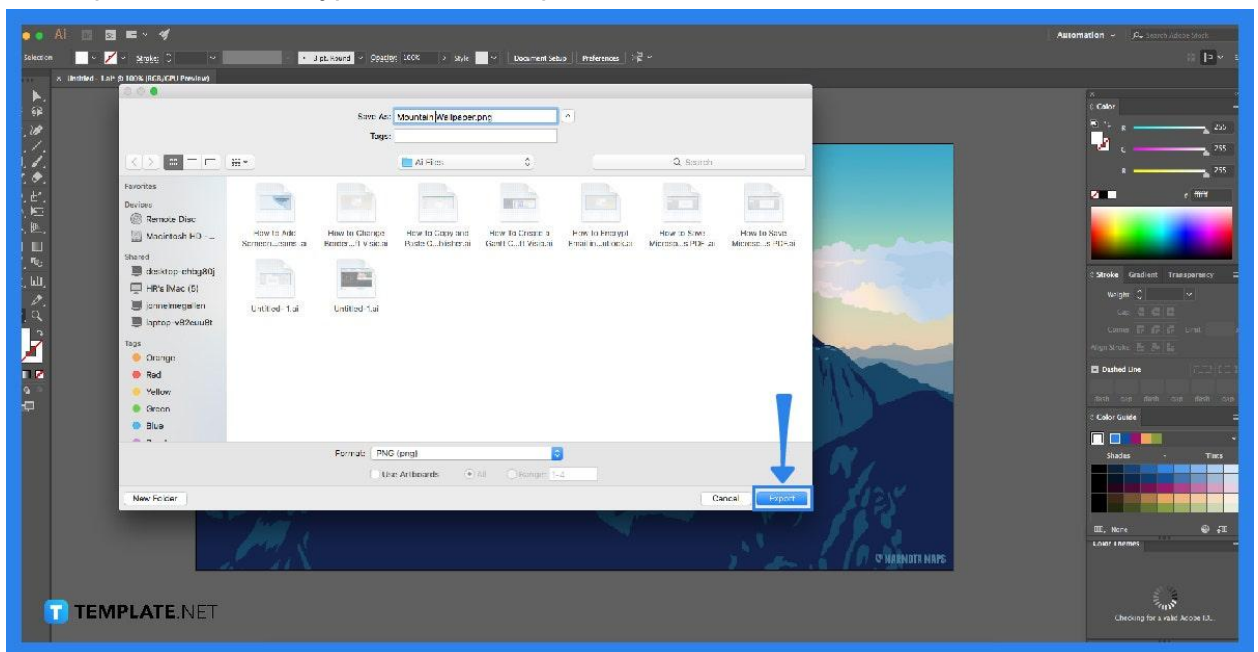

- **Step 3: Click on File and Export As**

Move your cursor to the top of the screen and click on File. A dropdown will appear, and from there click on Export As.

- **Step 4: Select File type**

A new window will appear where you can adjust and rename your file. Choose the PNG option on the file type and click Export.

The Export button is located at the bottom of the window.
