- **Step 2: Click 'File' and 'Export'**

  Go to the menu and click on 'File', a dropdown will appear and then click on 'Export'.

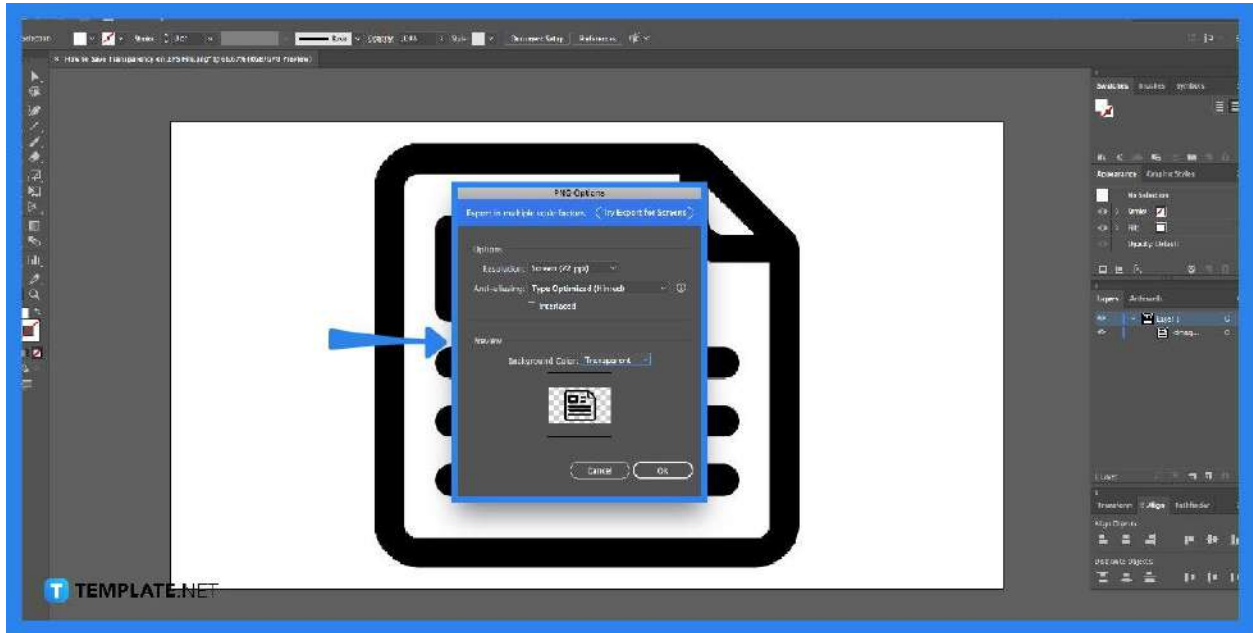

- **Step 3: Change File Format**

  A dialog box will appear. From there, you can change the file format to EPS on the dropdown located near the 'Save' button. After that's done, click on the 'Save' button.

- **Step 4: Select 'Transparent'**

  After clicking the 'Save' button another dialog box is left where you can choose the

EPS options to render your file. Choose 'Transparent' from the dropdown and then click 'OK'. And that is how you save transparency on a .eps file.
