

Inventory sizes vary when it comes to the different businesses and management systems involved. Read on and find out more about the specifics of inventory sizes.

## **Inventory Sizes Standard**

### **US - Letter**

8.5" × 11" inches - This size is made used for inventories like charts, count sheets, and pocket tags, to keep track of storage. Whether it is for tracking the increase or reduction of items, inventories of this size are a helpful tool.

### **A4 Size**

8.27" × 11.69" inches - A lot of inventories are made in this size. It has enough space and slots for listing common items as well as taking notes on the value of the average, percentage, or quantity of the items in storage.

## **Inventory Sizes for Print**

When it comes to making inventory for print, there is no definite size that is considered the standard. Companies from small businesses to huge corporate productions make use of different systems of inventory.

## **Inventory Sizes for Business**

As mentioned above, there is no known standard for inventory sizes. However, the usual size for business inventory is 2" × 3.5" inches.

## **Inventory Sizes for MS Word**

Inventory sizes on Document word vary based on what types of inventory are used and for what business. It is economic to make use of the US and A4 sizes, 216 × 279 mm and 210 × 297 mm, respectively.

## **Inventory Sizes for Apple Pages**

When working on inventory sizes on apple pages, you are free to use any size you wish. While the sizes 216 × 279 mm (US) and 210 × 297 mm (A4) are recommended, you can make use of any size that is suitable to your business and inventory system.

# **Inventory Sizes for Google Docs**

Inventory sizes in Google Docs vary depending on the kind of business and the inventory management system that is in use. Whether it is for a clothing store or a car engine factory, feel free to use any size that fits your business' needs as there is no recommended or standard size for inventory.
