# How Do I Add PNG in Adobe Premiere Elements

Adobe Premiere is the recommended video editing program for filmmaking, television, and web-based video content. Creative capabilities, as well as linkages with other Adobe applications and services, assist you in turning raw material into completed films and movies.

How Do I Add PNG in Adobe Premiere Elements

When you import media files into Adobe Premiere Elements, they are added to both the Quick view and Expert view timelines. Additionally, there are various methods you can add a PNG in the software.
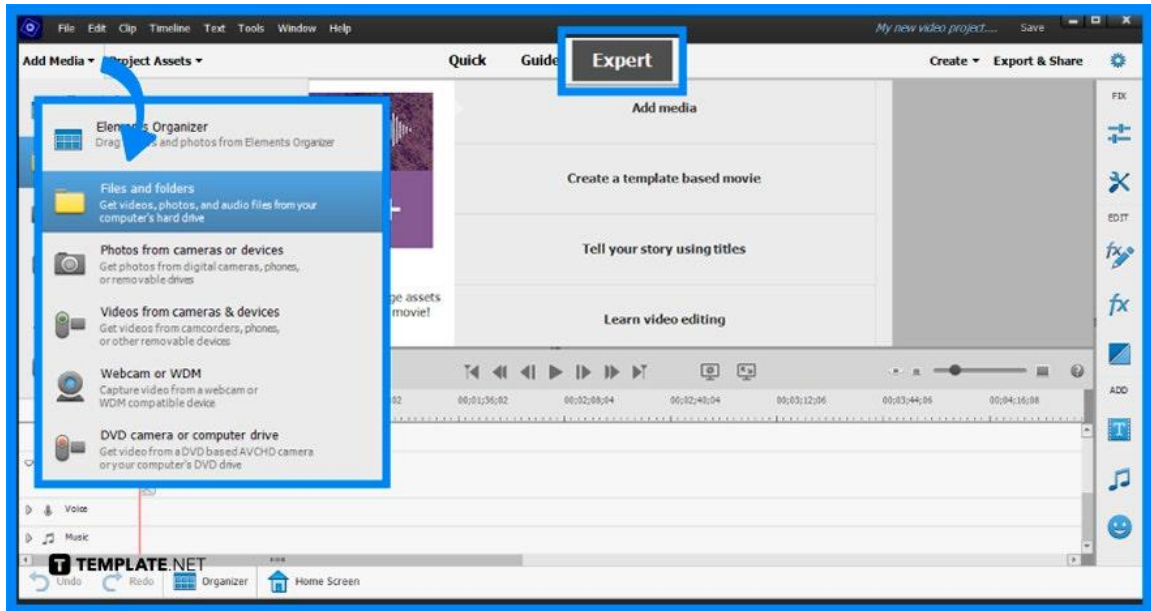

- **Step 1: Open Adobe Premiere Elements**

The first step you will need to do is to access and launch your local Adobe Premiere Element software. Click on the icon of where you have it placed on your desktop to open it. The software will not open to the intended program right away so you will need to click on "Video Editor" to open the video editing software.

You can also access older versions of Premiere Elements at the bottom left if you are more familiar with using the previous versions of the software.

- **Step 2: Add Media**

Proceed to the "Expert" selection at the top. To begin adding in PNG, the first Click "Add Media", followed by "Files And Folders". Locate and select the desired photos, then click "Open." If you want to add an entire folder, you can do so by selecting an entire folder and then clicking "Import Folder." Alternatively, you can also upload media from the "Elements Organizer," the "Photos from camera or devices," or "DVD camera or computer drive".

With the newly opened window, you can select the file format as "PNG File" to filter the specific photos format you want to add.

- **Step 3: Drag Media to Edit**

Once the PNG files are present within your Project Assets panel, you can click on them and drag them over to where it says "Video 1" or other video sections to begin the video editing process.

You can remove files from the Project Assets panel
if you don't intend to utilize them entirely.
