

# How Do I Create an EPS Logo?

Learn how to create an EPS logo. To expand your skills in creating designs within other formats.

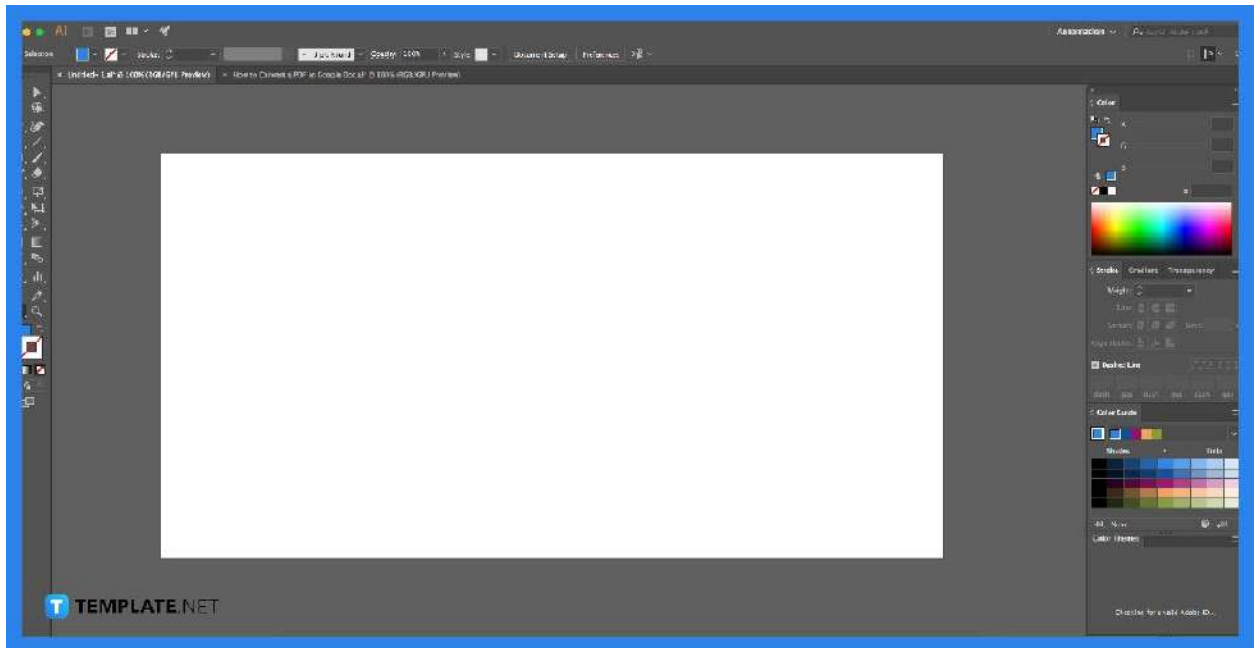

## How Do I Create an EPS Logo?

Creating a logo may take time, but saving it as an EPS file doesn't. Here's how you get it done with these steps.

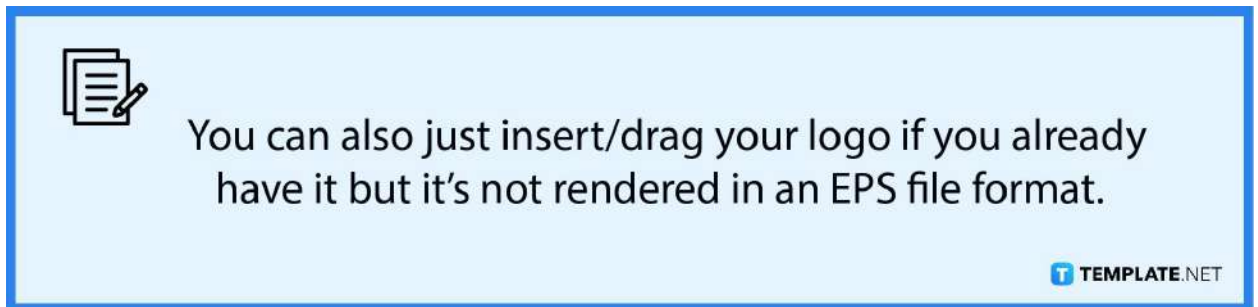

- **Step 1: Open Adobe Illustrator**

To get started on making your EPs logo, open Adobe Illustrator.

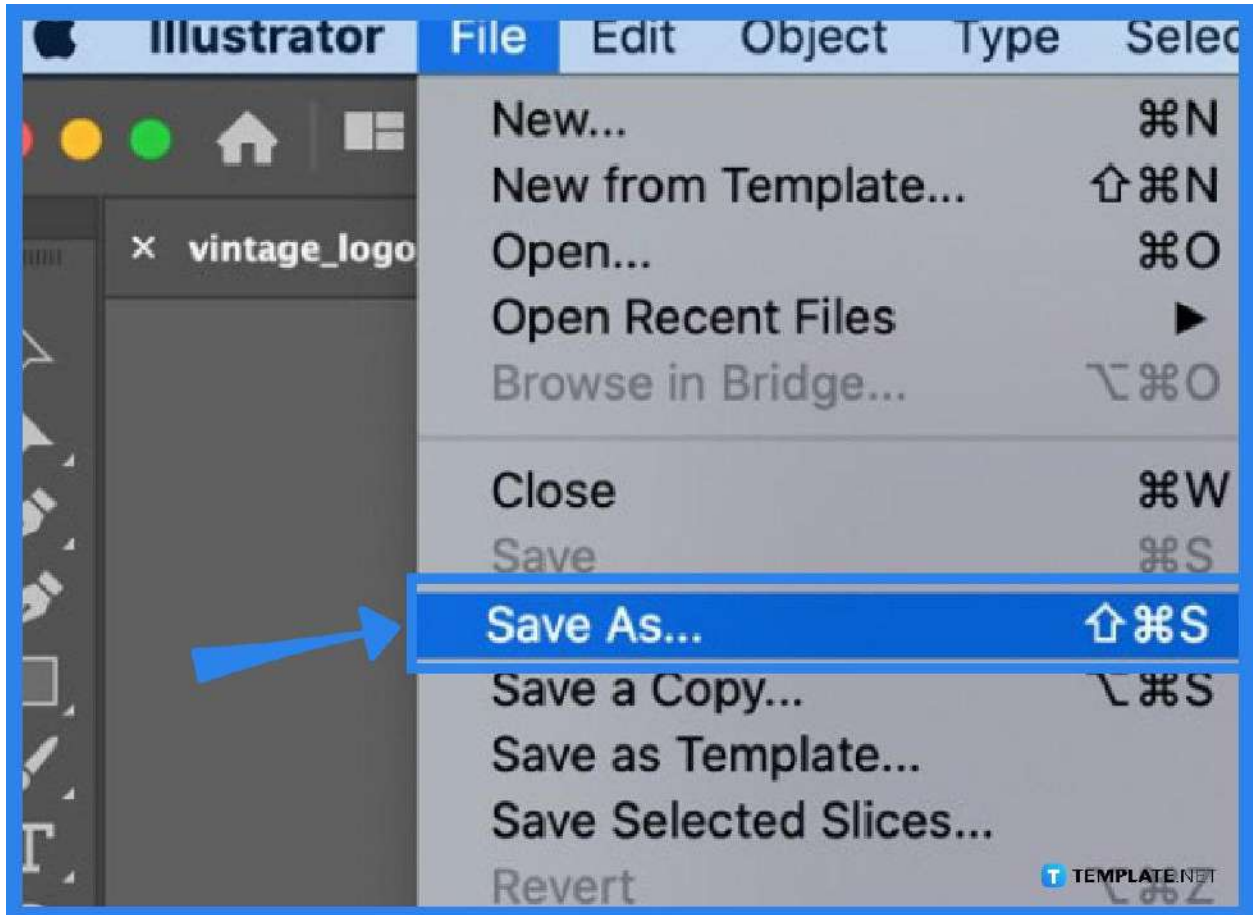

- **Step 2: Create Your Logo**

Next, create the logo design, add color, and finalize the details.

- **Step 3: Click 'File' and 'Save As'**

After creating your logo's design, move your cursor to the menu bar and click 'File' followed by 'Save As'.

- **Step 4: Choose EPS file format**

A dialog box will open, from there, choose the EPS file format from the options, and then click the 'Save' button. And that is how you create an EPS logo.

## FAQs
