How Do You Make Longer Timeline in Apple Motion

The duration of a video or film project varies on the need and overall concept of the project; others settle with a shorter timeline while some create a longer timeline. Apple Motion allows you to create different audio-visual content in different timelines easily and efficiently.

How do you Make a Longer Timeline in Apple Motion

The timeline is responsible for controlling all timing aspects of your project. Learn to adjust the timeline of your video and film projects by walking through the step-by-step process below.

• Step 1: Open Apple Motion

To start, open Apple Motion on your IOS devices. This software can be downloaded

Library and Inspector: Access built-in content and adjust object settings.	Project pane: Select and arrange objects in your project.	Canvas: Arrange and play back your project.

on App Store and is the best way to build effects on Final Cut Pro.

• Step 2: Go to your Project

Choose File, then go to Open, a dialog box appears from there then navigate the project file you want to use, and then click Open.

• Step 3: Proceed to Timeline

The timeline is located under the timing toolbar in the Timing Pane. The timeline consists of three areas: layer list, track area, and ruler.

Timeline	- W Q @	<u>୍କ ଲ</u> ା ପ୍
- 🔻 🛄 Group	i= ~	2 Objects

Small 0	<u>Q (0</u> Q (0)	

• Step 4: Change Value

Go to Edit, then click on Project Properties, or simply press Command-J, then change the value of the Duration field in the Properties Inspector.

• Step 5: Change Duration in Seconds, Minutes, and Hours In the timing display, click the down arrow to pop up the menu and set them to Show Timecode and Show Project Duration. After, set the duration to a specific timecode value by entering them in this format: HH:MM:SS:FF format (hours:minutes:seconds:frames), including a colon between each double-digit number.

FAQs

What is an Apple Motion?

Apple Motion is a motion graphics tool to create imaging effects for a variety of video and film projects.
