

How to Add Fonts in Adobe Psd

Adobe Photoshop is friendly to graphic artists who are creating material that involves heavy typography. With the convenience of Photoshop, avid users are able to incorporate fonts from their personal desktops.

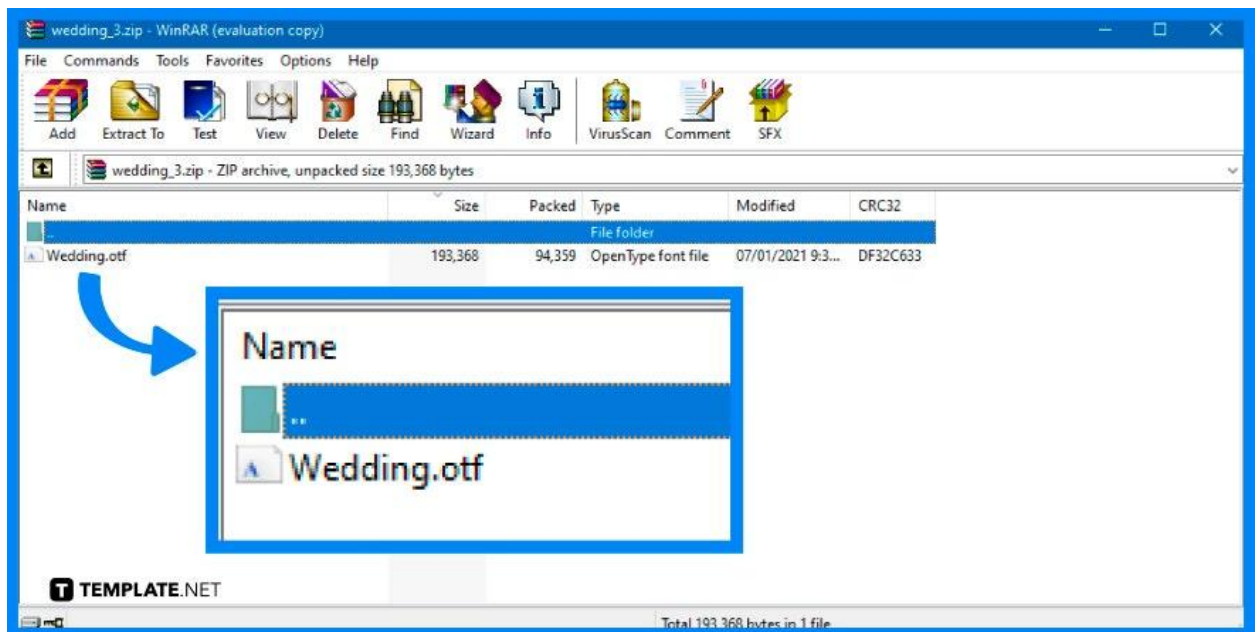

How to Add Fonts in Adobe Psd

Learning how to add fonts in Photoshop is a simple yet necessary skill because practically every design project requires the inclusion of fonts you may not have readily available in your device. This Photoshop fonts tutorial will show you how to download a font from an internet library and activate it in Photoshop.

- **Step 1: Download Desired Font**

Look through your collection for a font that will work for your project. Most of the more established sites will have filtering options, allowing you to reduce your search by specific factors, such as displaying only handwritten or ornamental fonts. When you have found a suitable option, click the download button.

- **Step 2: Locate Downloaded Font**

The next step you will be doing is to find the recently downloaded font file in your computer, this can mostly be found in your 'Downloads' folder. If the format is ZIP, then you may need to double-click it or extract the content.

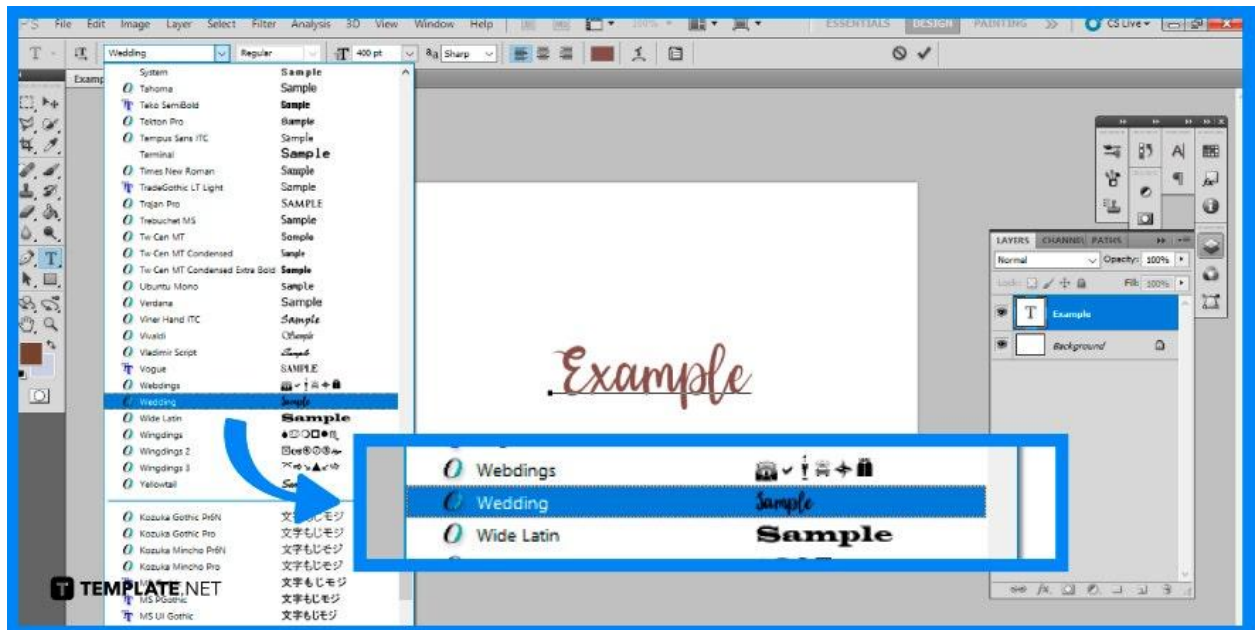

OTF and TTF are two of the most prevalent font file extensions to be aware of.

- **Step 3: Install the Font**

To install your font, you have two options to do so. Double-click the font file to launch the Font Box program, where you may install the font by just clicking a button, making it available in all applications on your desktop, not just Photoshop for Mac. Or you may also manually copy the font file from the downloads folder into the 'Appearance and Personalisation' and then open 'Fonts'. Drag the OTF or TTF file to activate them.

- **Step 4: Launch Photoshop**

Once you have the font installed, it will then be available on your computer and for other applications and software. Open Photoshop and as you select the 'Text tool', scroll through the available fonts and there you will see your desired font now available.
