# How to Change to Landscape in Adobe InDesign

Landscape orientation is used for wider horizontal designs or subjects. It is commonly applied to a page that contains a big table or wide presentation. In this article, learn how to change to landscape in Adobe InDesign.

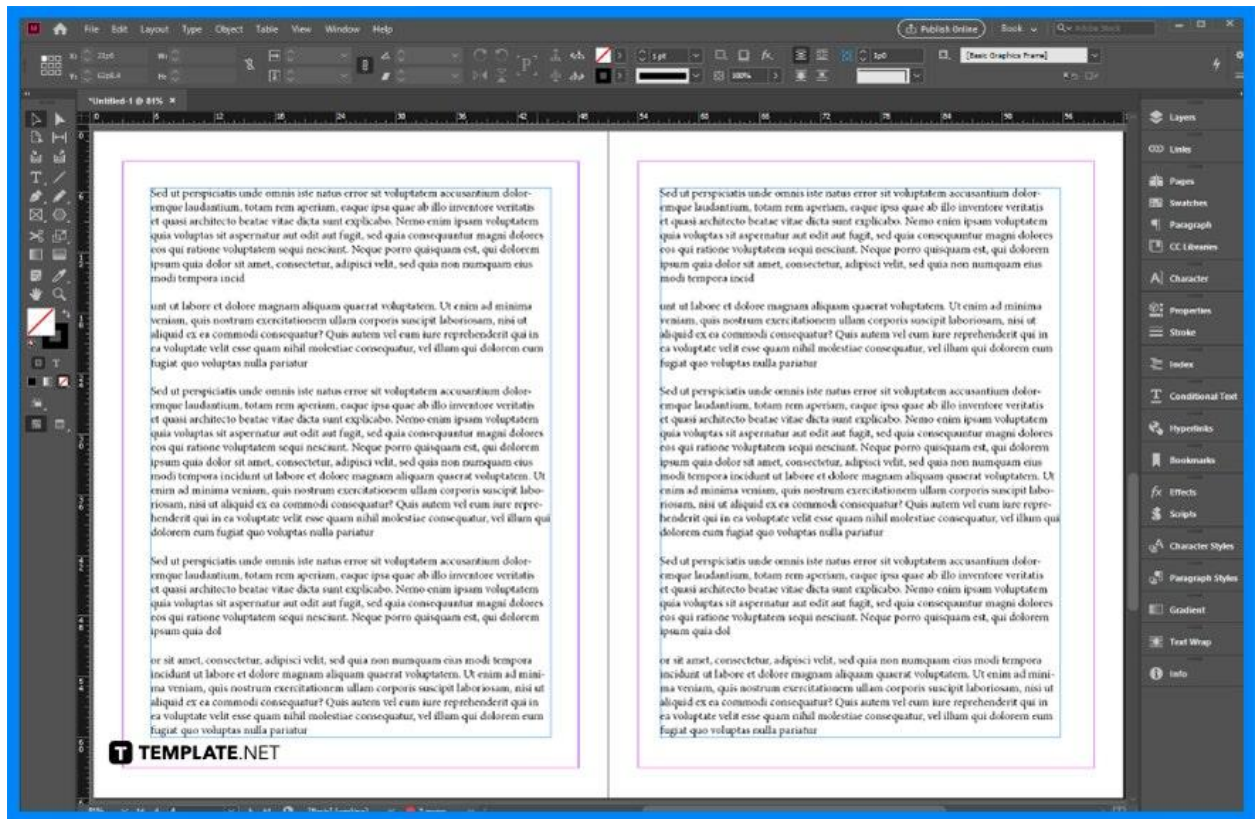

How to Change to Landscape in Adobe InDesign

Use the Page Layout tab to modify the orientation layout of your page. Below are some steps that you need to follow when you change your document or publication page layout to landscape using Adobe InDesign.
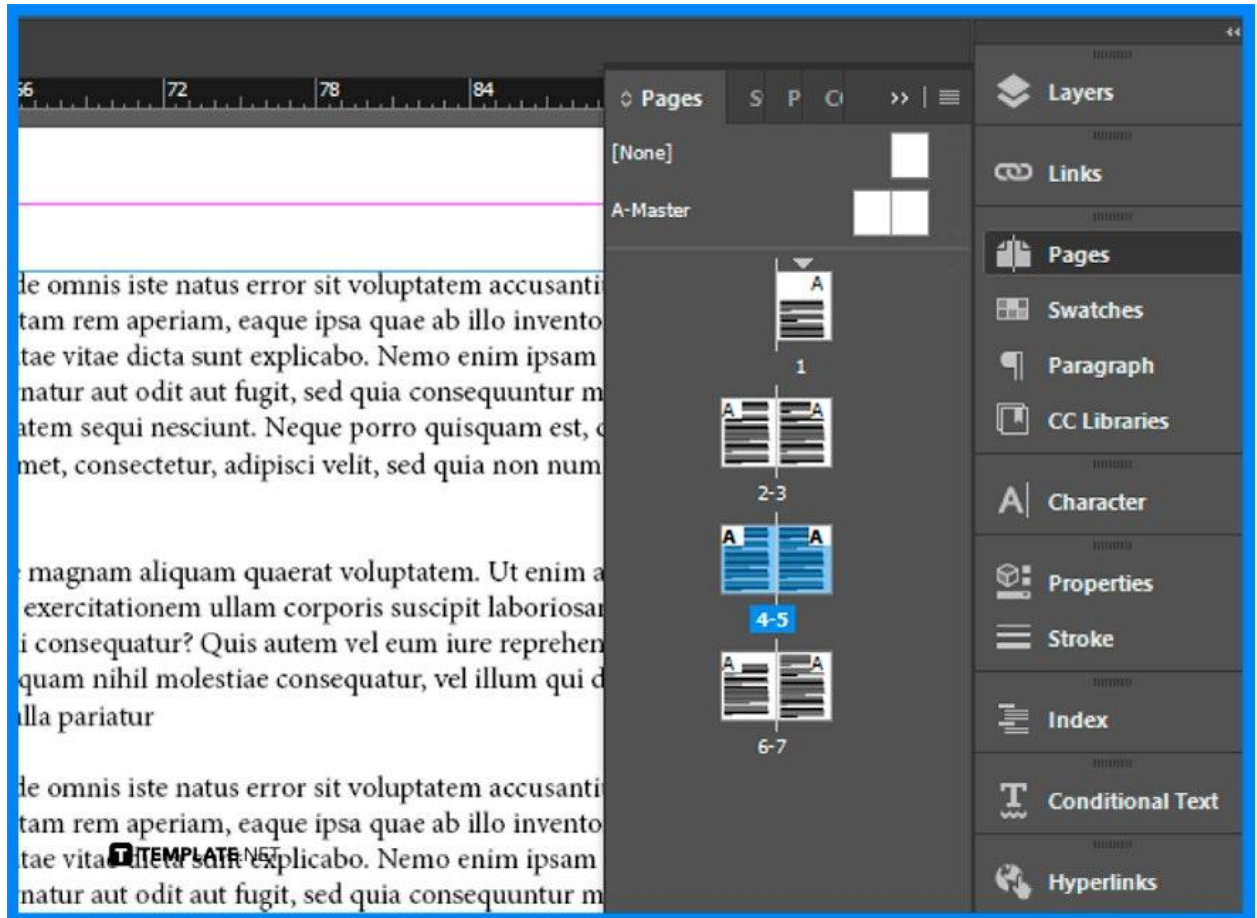

- **Step 1: Open the Document**
  Go to Adobe InDesign. Then, open the document you want to change the page orientation to landscape.
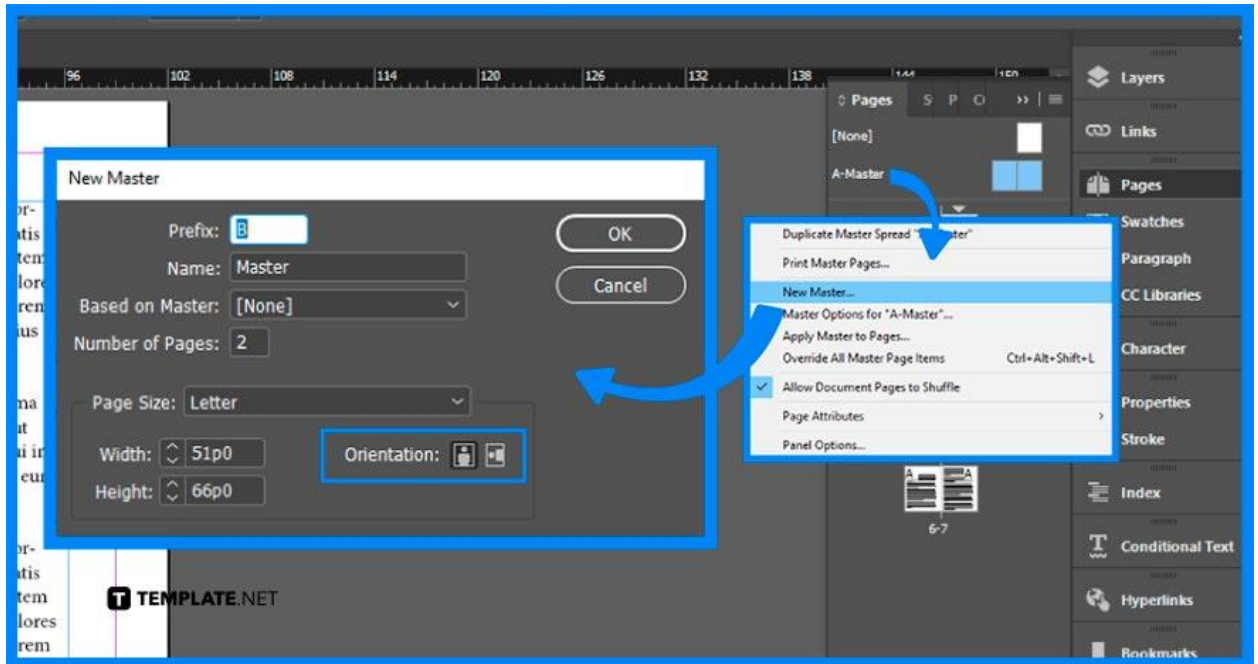

- **Step 2: Go to the Pages Panel**
  Go to the right side of your screen and find the Pages panel. If you can't find the Pages panel, go to Window > Pages.

- **Step 3: Change the Page Orientation**
  In the Pages panel, click anywhere you want, click the page, select New Master in the options at the right top part of the panel, and a new window will appear on your screen. There are different options that you can modify such as the prefix, name, based on Master, number of pages, width, height, and orientation, so change the orientation of the page to landscape and click OK.
